

**We are running a study to investigate which compression therapy is better at treating venous leg ulcers...**

Compression wraps

Four- layer bandage

Two-layer hosiery

Two-layer bandage

**... by looking at the effects on**

Reducing ulcer  
healing time

Improving quality of life

Reducing ulcer related pain

Reducing ulcer  
recurrence

**... but we do not know which treatment works best.**

**Our study will compare these compression therapies and measure what happens to people during their care. This will help people make more informed treatment choices in the future.**
